

Circular Cleaning Eye Cover For DN100 and DN150 PVC

Description

Engineered for performance and reliability, drainage access points are installed at strategic intervals (typically every 15–20 metres) to provide easy access for cleaning and maintenance equipment. The circular cleaning eye cover enables fast and effective removal of blockages, making them ideal for high-demand environments such as hospitals, hotels, restaurants, and industrial facilities. Designed for use in sewerage and wastewater systems, they assist in clearing debris and gritty materials while supporting smooth, self-cleansing flow. They also allow for convenient inspection of internal pipework to ensure long-term system efficiency, and are available in a range of sizes to suit various project requirements.

Benefits

Made with ductile iron

High fatigue and tensile strength

Low maintenance ideal for different installations

Manufactured in a variety of sizes to meet specific applications
