

SHIELD® 600mm Hinged Cover and Frame

TECHNICAL GUIDE 4.8
DATE ISSUED: 07.23

INTRO

The SHIELD® 600mm is a high performance, sealed and hinged cover and frame with greater watertightness. The prime feature of this cover and frame is the integrated Safety Grill that is tested to 10kN.

Unlike other manhole covers the removable stainless-steel Safety Grill does not sit on the rubber gasket therefore enhancing watertightness and eliminating noise from metal-to-metal contact.

DESIGN FEATURES

Integrated Safety Grill

EPDM gasket that limits water ingress and provides stability

Secured to frame with two flexible front and rear torsion spring bars

Able to be secured with a cam lock locking device.

Three equally appropriately spaced lifting handles for safe lifting

Able to be personalised e.g. local council logo

FIELD OF USE

All stormwater applications and wastewater applications

All traffic environments including high traffic

Where water sealing is a priority
